

INTRODUCING

# Hippo Virtual Consulting™

Conventional in-person specialty consultations require additional travel, time, and resource investment for the consulting physician and do not provide the convenience or clinical efficacy of real-time specialist advice or second opinions in urgent cases. Patients often have to wait for weeks or months to get a specialist appointment and this can lead to unnecessary treatment delays and negatively impact health outcomes. Plus, exposing specialist physicians to unnecessary risk when examining infected patients in isolation zones can be detrimental to the patient as well as the clinician.

**Hippo Virtual Consulting™** provides a cost-effective and convenient solution to these challenges, while increasing the volume and diversity of cases a specialist can see and improving specialist productivity.

## How it works

Hippo Virtual Consulting™ enables specialists to remotely examine patients through video and audio collaboration with clinicians wearing head-mounted devices. The clinician examining the patient wears a head-mounted voice-activated display with camera giving the remote observer a “through the eyes of the practitioner” viewpoint, as if they were there in the clinic.

## Clinician Benefits

- Get real-time second opinions or physician consults whenever they're needed, and improve the quality of care you are delivering to your patients
- Offer remote specialty services in all settings – your office, in the field, or at a patient's home
- The remote specialist “sees through your eyes” and can communicate with you and the patient through internal speakers and digital microphones or through an external device
- Share controls, like zoom, flashlight, and file upload with the specialist
- Record the consultation for documentation, follow-ups, or coordination with members of your care team
- Leverage a global network of specialists for rare diseases, not just those in your hospital or clinic

## Participant Benefits

- Provide specialty consultations conveniently from any device, reaching patients in remote locations and diverse healthcare settings
- Conduct remote examinations with a perfect “through the eyes of the practitioner” viewpoint and light conditions on the patient, zoom in, and receive immediate clinical feedback
- View patient imaging and records in real time as the clinician can share their display throughout the session
- Use recordings for before-and-after comparisons, share them with colleagues, or use them for teaching and documentation purposes
- Reduce time spent on travel and minimize your risk of contracting or spreading communicable diseases
- Expand your physician referral network and improve the scale and reach of your clinical operations

## Consulting Reimagined

Hippo Virtual Consulting™ is revolutionizing the consulting experience. It promotes time and cost savings through remote, effective video collaboration during consultations, and allows for real-time clinical input and second opinions, enabling smarter decision making and improving the quality of patient care.

**Headset:** hands-free, voice-activated wearable computer

**Display:** adjustable micro-display emulates a 7" mini-tablet screen

**Navigation:** advanced noise cancellation and voice recognition technology

**Camera:** 16MP, autofocus and image stabilized for high-resolution photo/video capture

**Videoconferencing:** enables real-time 1:1 and group video conferencing

**Video Recording:** allows user to record, store and forward video files

**Boom Arm:** Six degrees of freedom, adjusts for either eye, any head size or eye relief, and can be worn over PPE. User can flip display out of way when not in use

**Connected:** Wi-Fi and Bluetooth enabled, as well as LTE and 5G compatible, can connect securely with any hospital system and connected device

**Powerful:** Runs Android 8.1+ on Qualcomm chip with 2GB RAM/16GB memory

**Long Shifts:** Rechargeable and hot swappable full-shift battery

**Rugged & Clean:** IP66 dust and water resistant, safe up to 2-meter drop on concrete. Easily disinfected with alcohol spray

FEATURE	DESCRIPTION
EASY LOGIN	HEADSET: scannable QR codes [+ PIN optional]
	Web Portal/REMOTE: multi-tenant secure platform with logins
MESSAGING & FILE SHARING	HIPAA & GDPR compliant
VIDEO CALL up to 4 callers	HIPAA & GDPR compliant
	Displays pop-up window with the help for commands associated with the current screen.
	HIPAA & GDPR compliant
	HEADSET controls: Zoom, volume, mirroring, flashlight, record video stream
	Freeze frame: images from live video
ADVANCED EVENT SCHEDULING for Video calls	Schedule calls, waiting room
	Automated invitation (up to 4 people including caller)
HVC CONFERENCE ROOM VIDEO	Up to 50 (licensed & external) users, invite per URL+password
	Remote control of headset (limited for non-licensed users)
HIPPO VIRTUAL CONNECT	*Collaborate through Zoom, Microsoft Teams, Webex
CAPTURE IMAGES & VIDEOS	Record during video call and store locally
	*Store in HIPAA & GDPR compliant HVC cloud
	*Asynchronous video recording and sharing
EXTERNAL DEVICES	*Connect to and receive data from med devices (e.g., digital stethoscope)
HEADSETS	RealWear HMT-1 or Vuzix headset including android package kit
	Voice controlled: "say what you see" voice-driven command system
WEBPORTAL	Mobile App [Android] from any device and portal via all common web browsers
	Dashboard: call history, usage statistics, contact list

\*Coming soon

Physicians can share the recordings of the consultation with colleagues.

### About Hippo

Hippo Technologies is advancing the world of virtual care. We are a clinician-led company bringing a combination of global medical practice and next generation technologies to transcend conventional boundaries of distance, time and training to serve patients and those who care for them.
