

### Reduce Readmissions + Costs

Hippo saves money by reducing the need for travel and bringing the specialist to the patient via clinician extenders in the field, minimizing delays in care delivery.

### Double Clinical Capacity

Hippo extends the capabilities of the available workforce, enabling physicians to train while they treat and turning any clinician extender with a headset into a virtual specialist.

### Increase Productivity

Hippo enables faster triage, smarter decision-making, and reduces clinical error through real-time remote collaboration, increasing Specialty Physician productivity by up to 30%.

# Hippo Virtual Care™

Supercharge your clinicians with  
wearable voice-enabled computing.

Hippo's hands-free, voice-activated, wearable computing solutions deliver a "through the eyes of the clinician" viewpoint allowing healthcare practitioners and educators to collaborate in real-time with remote colleagues to support medical teaching, rounding, proctoring and specialist consultations.

- ▶ Multidisciplinary team-based clinical workflow platform
- ▶ Designed by clinicians, for clinicians to optimize adoption and usability ["Treat + Train"]
- ▶ Plug and play: only 1 hour of clinician training required
- ▶ Hands-free, voice-enabled mobility with clinical-grade security + compliance

**Hippo allows us to extend our specialty services into the community, into the home, saving time, cost, and improving access to quality care whenever and wherever patients need it. With Hippo, I can orient a patient or see a procedure as if I was physically in the room."**

**Thomas Matthew, MD**

Director, Johns Hopkins Cardiothoracic Surgery Program at Suburban Hospital

# Hippo brings the specialist to the patient with our next generation telehealth platform

The Hippo Virtual Care headset delivers a “through the eyes of a clinician” viewpoint to remote participants and observers.

**CLINICIAN + PATIENT**  
[Location Anywhere]

The Hippo Virtual Care platform allows Specialist Physicians or medical students to collaborate and observe real-time patient examinations or procedures from anywhere in the world on desktop, laptop or mobile.

## Seamless communication + remote collaboration

Remote observer gets a “through the eyes of the clinician” viewpoint via the headset with advanced remote control features and synchronous and asynchronous photo and video capture.

## Clinician-tested usability + workflow

Intuitive user interface built by clinicians, for clinicians. Hippo can be used through a web portal on multiple devices and is compatible with a variety of head-mounted displays and smart glasses.

## Industry-leading security + compliance

With secure login to the platform using SSO or QuickConnect QR Code and PIN, the HVC platform comes complete with state-of-the-art encryption and is HIPAA and GDPR compliant.

# Hippo in Action

Hippo Virtual Care adds seamless integration into clinical workflow **across the Health System Continuum**

- Team-based clinical workflow
- Plug and play; 24/7 support
- Hands-free, voice-activated
- Industry-leading compliance
- Clinical-grade data security
- Durable and resilient hardware
- Works with your existing systems
- Scalable and future-proofed

## HIPPO VIRTUAL CARE vs TELEHEALTH

Unlike traditional telehealth, which is generally suitable for simple primary care consultations, the Hippo Virtual Care solution combines voice-activated, wearable headsets at the point of care with a clinical-grade platform to deliver a “through the eyes of the clinician” viewpoint. First Responders to a trauma scene or remote healthcare workers at a rural clinic or patient home can livestream what they are seeing and doing to specialist colleagues who may be back in the hospital, for real-time consults on complex cases.

**A 200-bed hospital that implemented Hippo Virtual care in EMT, ER, OR and Inpatient discharges could save more than \$10 million in annual costs.**

▶ Anesthesiology

▶ Cosmetic Surgery

▶ Education

▶ EMS/First Responder Physician Consult

▶ Hospital Emergency Room

▶ Hospital Inpatient Care

▶ Home Health Physician Consult

▶ LTC Physician Consult

▶ Reducing Readmissions

▶ Remote Clinic/ Disaster Relief

▶ Surgical Services Operating Room

▶ Tele-dialysis

▶ Telestroke

▶ Wound Care

# Hippo features the most advanced headsets to suit all needs and use cases

## HIPPO SPEX

Pocket-sized leading-edge device for everyday use

- Lightweight, pocket-sized
- 2x HD cameras (16 MP + 8 MP) with laser pointer
- Fast processing speeds (Snapdragon 662)
- 2 hour battery life (+12 hours with tethered pack)
- Connectivity: WiFi, Bluetooth and 4G Wireless (with Dongle)
- Android platform for interoperability

## HMT-1

Rugged design ideal for frontline healthcare workers and long usage

- Rugged construction and durability
- 16 MP camera
- Fast processing speeds (Snapdragon 662)
- 12 hour battery, hot swappable
- Connectivity: WiFi, Bluetooth and 4G wireless (with Dongle)
- Android platform for interoperability

## NAVIGATOR

Advanced technical spec ideal for continuous usage and specialist applications

- Improved fit, weight and comfort
- Advanced HD 48 MP camera, low light quality
- Fast processing speeds (Snapdragon 662)
- 12 hour battery, hot swappable
- Connectivity: WiFi, Bluetooth and 4G wireless (with Dongle)
- Android platform for interoperability

## Getting Started

Hippo's Customer Success Team (HippoUX) is dedicated to helping you find, implement and support the optimal solution for your organization's Virtual Care program. Through our 5C approach (Clarification, Content, Communication, Culture & Connection), the HippoUX Team will customize your training program, define best practices, provide ongoing support, and continue to leverage new and emerging technologies to optimize your outcomes and KPIs and keep your organization at the forefront of the Virtual Care revolution.

## About Hippo

Hippo Technologies, Inc. is a global provider of Virtual Care solutions for healthcare and clinical education. We are a clinician-led company, bringing a combination of global medical practice and next-generation technologies to transcend conventional boundaries of distance, time and training to serve patients and those who care for them.
