# Hippo Virtual Care 2.0

**hippo**

+ Next-generation Virtual Care with team-based clinical workflow

+ Clinical-grade platform with hands-free, voice-enabled wearable computing

+ Plug and play: only 1 hour of clinician training required

> "Hippo allows us to extend our specialty services into the community, into the home, saving time, cost, and improving access to quality care whenever and wherever patients need it. With Hippo, I can orient a patient or see a procedure as if I was physically in the room."

**Thomas Matthew, MD**
Director, Johns Hopkins Cardiothoracic
Surgery Program at Suburban Hospital

The next-generation Hippo Virtual Care™ platform combines the most advanced voice-activated, Assisted Reality headsets and clinical-grade software allowing clinicians to collaborate remotely in real time to deliver specialist care to patients or train healthcare professionals.

Unlike traditional telehealth, the Hippo solution delivers a "through the eyes of the clinician" viewpoint, allowing First Responders to a trauma scene or remote healthcare workers at a rural clinic or patient home to livestream what they are seeing and doing to specialist colleagues who may be back in the hospital, for real-time consults on complex cases. This not only increases access to specialty care in rural areas, but also results in faster diagnosis and treatment, improving patient outcomes and dramatically reducing the overall cost of care.

## Seamless communication + remote collaboration

Remote observer gets a "through the eyes of the clinician" viewpoint via the headset with advanced remote control features and synchronous and asynchronous photo and video capture.

## Clinician-tested usability + workflow

Intuitive user interface built by clinicians, for clinicians. Hippo can be used through a web portal on multiple devices and is compatible with a variety of head-mounted displays and smart glasses.

## Industry-leading security + compliance

With secure login to the platform using SSO or QuickConnect QR Code and PIN, the HVC platform comes complete with state-of-the-art encryption and is HIPAA and GDPR compliant.

# HIPPO VIRTUAL CARE FEATURES AND BENEFITS

| | | |
|---|---|---|
| **Communication + Collaboration** | Communication integration | Connect to popular communication platforms like Microsoft Teams, Google Meet, Zoom, Cisco WebEx, and Skype |
| | | HIPAA and GDPR compliant chat function |
| | Remote Collaboration | Headset user can assign controls to remote observer, who can control the headset's camera in real-time, including zoom level, flashlight and record functions. |
| | Synchronous and Asynchronous Video and Image capture | Record videos and capture photos synchronously and asynchronously |
| | Document exchange | Record, store and forward audio, video or other files across devices |
| **Usability + Workflow** | Headset Agnostic | Select from 3 different types of head-mounted displays or smart glasses, including Hippo SPEX, Realwear Navigator 500, Realwear HMT-1. All have hands-free "say what you see" voice-driven OS |
| | Scheduling | Start a consultation now or schedule one for later as per your convenience |
| | Clinical Decision Support | Send data, files and imaging to headset user at point of care |
| | | Peer-to-peer consultation, family interaction |
| | Workflow Automation | Create and tailor workflow processes and automated checklists to streamline and standardize solutions for your specific healthcare needs. [*Coming soon] |
| **Connectivity + Accessibility** | Multi Device Supported Platform | Remote access via a web portal on laptop or desktop or through an app on android or iOS mobile devices |
| | Fully Networked | 5G-ready, WiFi and Bluetooth enabled |
| | | Can connect headset to 5G network via Dongle and SmartSIM solution |
| | Interoperability | Fast Healthcare Interoperability Resources [FHIR], HL7, open API |
| | | US Clinical Data for Interoperability dataset [USCDI] |
| **Security + Compliance** | Authentication | Real-time collaboration with care team members |
| | | Multi-tenant secure platform |
| | Compliance | Availability check and appointment scheduling for videoconferencing [within Hippo Virtual Care] |
| | | ISO certified |
| | | Secure cloud storage via HVC platform |

## About Hippo

Hippo Technologies is a global provider of Virtual Care solutions for healthcare and clinical education. We are a clinician-led company bringing a combination of global medical practice and next generation technologies to transcend conventional boundaries of distance, time and training to serve patients and those who care for them.
